

**Typical Web Wall Detail
Showing Bars wD**

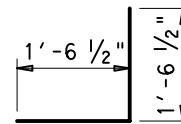

**Typical Crash Wall Detail
Showing Bars wD**

For Web Walls:

- ① At Contractor's option, bars wD may be placed with the column or may be drilled and grouted with the anchorage end sloped 1:6 into column. On interior columns, the contractor has the option to place one bar passing through the forms instead of two opposing bars.

For Crash Walls:

- ② At Contractor's option, bars wD may be placed with the column or may be drilled and grouted with the anchorage end sloped 1:6 into column.
